

AT&T Video Services

Through a series of strategic initiatives, AT&T companies plan to deliver a state-of-the-art portfolio of entertainment services that will give consumers compelling and innovative new choices. Customers have or soon will have access to cutting-edge video services through one of three bold solutions.

COMING SOON AT&T U-verseSM TV

AT&T companies plan to introduce AT&T U-verseSM TV, an IP-based video entertainment experience. Initially the service will feature hundreds of channels, a video-on-demand library, a crisp electronic program guide, tunerless picture-in-picture technology and fast channel change. AT&T companies are on track to begin scaling

the AT&T U-verse suite of services in mid-2006, entering more markets and adding new and innovative features. For example, plans include the introduction of whole-home digital videorecording (DVR) functionality. This allows customers to record, watch, and program their DVR to enjoy standard-definition or high-definition programming from any TV in the house.

COMING SOON AT&T HomezoneSM

AT&T companies will launch AT&T Homezone, a groundbreaking new service that will combine satellite TV programming, high-definition and/or standard-definition DVR, Caller ID on the TV, movies-on-demand, photo-sharing and music through an award-winning new set-top box. Once this service is available, customers who have access to both SBC | DISH Network service and DSL* from AT&T companies will be able to combine their communications and entertainment content into one easy-to-use package delivered to their televisions and stereos. Customers will also be able to log onto their AT&T Homezone receiver remotely, through a Web browser or wireless phone, to schedule DVR recordings, start movie downloads, and enjoy music and photo collections.

TODAY AT&T | DISH Network

Satellite TV service from SBC | DISH Network,* launched in 2004, offers consumers a powerful, competitively priced choice for their entertainment service. Satellite TV from SBC | DISH Network offers advanced services, such as digital videorecording and high-definition TV programming. Other enhancements, including video on demand and new receivers featuring both high-definition and standard-definition digital videorecording, are now available.

*With the close of its acquisition of AT&T Corp., SBC companies are currently making the necessary legal and regulatory filings required to offer products and services under the new AT&T brand.
